

BOWCO

BAKING INDUSTRY PEEL BOARDS

Product Superiority: Now say goodbye to splinters and warping forever! Bowco Peel Boards are manufactured with a higher grade of plastic that won't warp or splinter. Limit your liability by eliminating wood peel boards.

Cost Savings: Plastic peel boards last for years unlike wooden boards which must be replaced every three to five years.

Improved Manufacturing Process: Plastic peel boards hold up to the proofing room temperatures so they won't warp and are durable enough to endure years of conveyor transport wear.

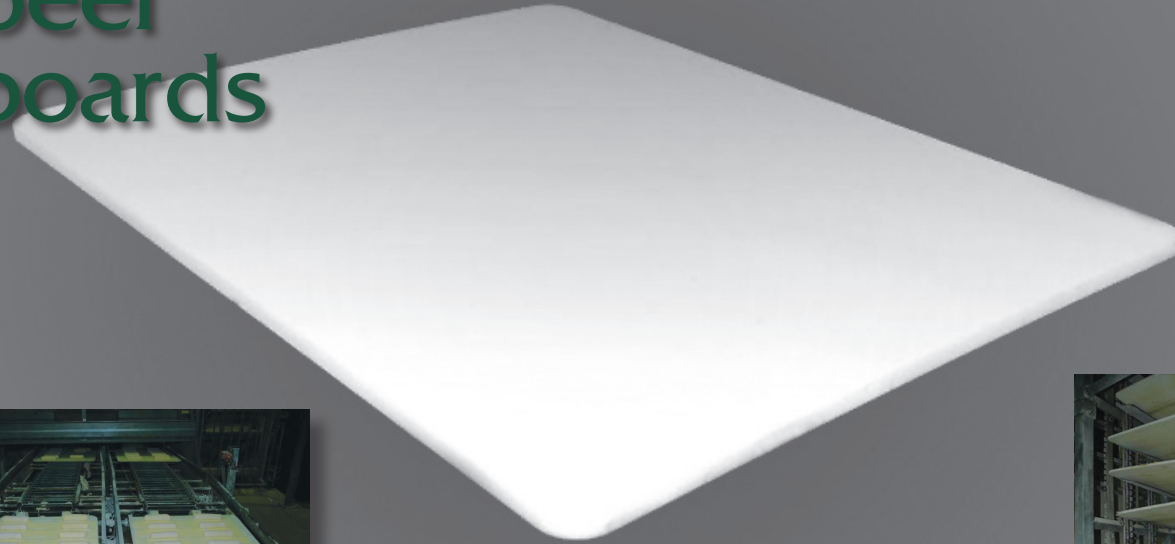

Cleanliness: Bowco plastic meets high FDA standards. Our material will withstand sanitized washing conditions without warping.

BOWCO ... making life easier for the baking industry!

baker's finest peel boards

Bowco Inc. introduces an innovative plastic peel board designed specifically for use in the baking industry. Bowco Peel Boards are produced using a revolutionary process that yields high quality, dependable proofing boards that won't warp, buckle or splinter like their wooden counterparts. Bowco boards undergo very stringent manufacturing conditions and endure the same exposure to heat required in proofing operations and conveyor transport wear typically encountered industry-wide.

Our superior grade of plastic eliminates the nuisance problems associated with wood peel boards. Unlike wood, Bowco Peel Boards won't stick, splinter or warp, which translates to less down time, lost product and more savings for our customers.
